

Ryan James Pfister

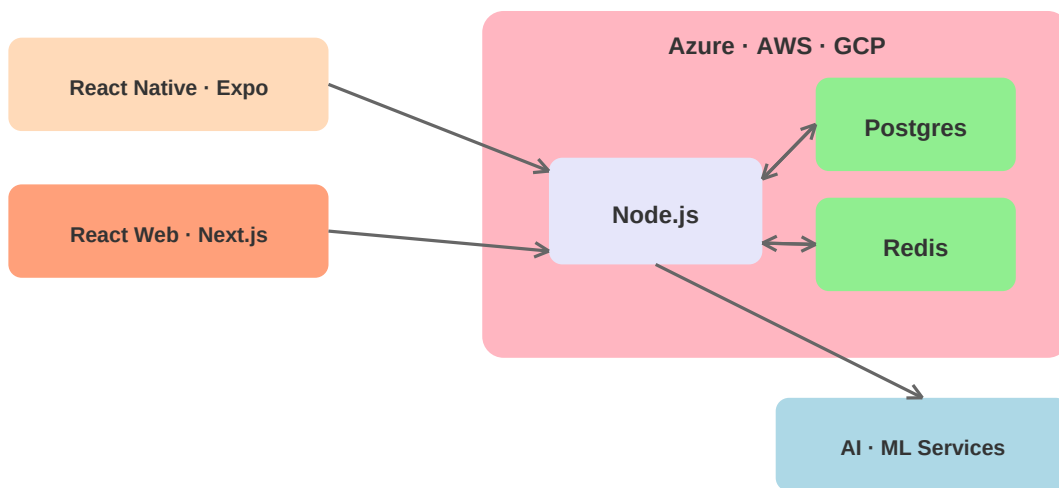

Senior Software Developer

Summary

I've been developing apps for 16+ years, with the last 8+ focused on React Native for mobile and React for web. I lead greenfield mobile projects end to end—architecture, CI/CD, testing, release processes—and partner closely with UX and backend teams to ship fast without sacrificing reliability. I'm comfortable across the full stack (TypeScript, Node, PostgreSQL) and cloud services such as Azure, AWS, and GCP, and I've integrated with C#/ .NET APIs in production. Formerly a full-time ASP.NET C# developer, I'm very comfortable in this tech stack.

What I Actually Do

Experience

Senior Software Developer — All Gravy ApS, Copenhagen (Remote)

Jan 2026 – Present · Remote from Valencia, Spain

Full-stack software development for a Danish fintech company building salary payment and financing technology. Working remotely from Spain as an independent contractor.

- Building and shipping product features across the full stack
- Working within a cross-functional team across Danish and international time zones

Freelance Full-Stack Developer — Ryan's Technology LLC

Apr 2023 – Aug 2023, Aug 2025 – Dec 2025 · Remote

I ship full-stack features and new products with a focus on React/Next.js, React Native, Node.js, and scalable cloud services. Work ranges from quick POCs to production systems.

Selected Work

- Edgeli: Contributed across the stack (Node backend, web/mobile frontends) to help the team ship features faster.
- Mae: Built an AI-powered mobile app (React Native + Node) integrating modern model APIs for intelligent in-app experiences.

- Flutter Connect: Delivered a networking app for physicians, full-stack, with a focus on rapid iteration and production readiness.
- Sound Like Us: Launched an AI storytelling platform with high-fidelity voice cloning, including a distributed audio processing pipeline (Celery), voice preprocessing and text-chunking systems, and orchestrated multiple ML models with CUDA optimization and fault-tolerant initialization.
